Quarterly Feed Production Statistics for the Quarter ending March 2019

These statistics report total tonnage of manufactured animal feed and total tonnage of raw materials used in feed production. This report does not include blended feed.

These statistics now include the breakdown of species specific data for feed production. This breakdown had been excluded in previous publications from March Quarter 2010 to June Quarter 2013.

The companies who have provided NZFMA with production statistics for the current quarter are set out at the end of the report together with the companies who provided statistics for the same quarter previous year. There was a decrease in imported palm kernel for the current quarter by 40.1% to 390,885 tonnes compared to the same quarter last year.

Please note all figures reported in the tables below in this Executive Summary are in metric tonnes (unless otherwise specified).
